SUBJECT INDEX

Acrylates, review of the toxicity of multifunctional, 149
Adipocyte triglyceride, influence on the partition of 2,2′,4,4′,5,5′-hexabromobiphenyl, 541
Alkaline phosphatase activity in rat leukocytes, benzene-specific increase when exposed to organic solvents, 581
Aluminum chloride, tissue distribution in weanling rabbits, 97
Alveolar particle clearance, changes due to nitrogen dioxide exposures in the rabbit, 255
Ammonium metavanadate, effect on murine immune response, 279

Benzene-specific increase in leukocyte alkaline phosphatase activity, in rats exposed to organic solvents, 581
Blue-green algae, use of rat hepatocytes to study toxicity of, 325

Cadmium, effects of mobilization by chelating agents, 267
Cadmium chloride, age-related dose response of reproduction parameters in the rat, 393
Chlordimeform:
  acute and delayed effects on cardiovascular function on postweanling rat, 195
  comparison of effect on cardiovascular function of different routes of administration in postweanling rat, 207
Chlorine dioxide, effects on thyroid function in African green monkey and the rat, 235
Chromium, effects on chondrocytic differentiation in vitro, 137
Cimetidine, interactions between methylparathion, parathion, and, 337
Coal dust and diesel emissions, effect of inhalation on heart and pulmonary arteries of rats, 33

1,2-Dibromo-3-chloropropane, mutagen activation by cytosolic glutathione *S*-transferases and microsomal enzymes, 503
Diesel emissions and coal dust, effect of inhalation on heart and pulmonary arteries of rats, 33
O,O-Dimethyl, *S*-ethyl phosphorothioate, suppressive effect on immune response, 465
1,3-Dinitrobenzene, testicular toxicity and infertility in male rats treated with, 477

Estradiol, comparison of histological responses of female mice, 531
Ethmoid turbinate and maxillary regions of beagle dogs, mucociliary clearance and particle retention in, 569

Glutathionine metabolism, mechanism of protection by zinc against mercuric chloride toxicity in rats, 75

2,2′,4,4′,5,5′-Hexabromobiphenyl, influence of adipocyte triglyceride on the partition of, 541
Hexachlorobenzene (HCB), enhanced withdrawal from chickens of pentachlorophenol and, 359
2-Hydroxy-4-methoxybenzophenone, disposition in rats dosed orally, intravenously, or topically, 491
Human IMR-90 fibroblasts, model system of in vitro chemical carcinogenesis, 165

Immune response, suppressive effect of *O,O*-dimethyl *S*-ethyl phosphorothioate on, 465

Kidney morphology and function, in the young of rats malnourished and exposed to nitrofen during pregnancy, 1

Lead, in tissues of woodchucks fed crown vetch growing adjacent to highway, 91
Lead concentration in deciduous teeth, variation related to tooth type and analytical technique, 437
Lipemis and polychlorinated biphenyls, effects on serum analytes, 369

Manganese chloride, in vitro augmentation of natural killer cell activity by, 243
Maxillary and ethmoid turbinate regions of beagle dogs, mucociliary clearance and particle retention in, 569
Mercuric chloride toxicity, mechanism of protection of zinc against, 75
Mercury and water deprivation, interaction on the hematology of chickens, 55
1-(8-Methoxy-4,8-dimethylnonly)-4-(1-methylethyl)benzene (MV-678), reversible inducer of rat hepatic microsomal drug metabolism, 111
Methylmercury:
  dose- and sex-dependent alterations of mercury distribution in fetal mice following exposure to, 425
  toxicity, distribution, and elimination of thiol complexes of, 219
Methylparathion, interactions between cimetidine, parathion, and, 337
Mixed-function oxidase, induction in mouse lymphoid tissues by polycyclic aromatic hydrocarbons, 185
Murine immune response, effect of ammonium metavanadate on, 279

Natural killer cell activity, in vitro augmentation by manganese chloride, 243
Nickel compounds, in vitro comparative cytotoxicity in canine and rodent alveolar macrophages, 105
6-Nitrobenzo[a]pyrene:
  denitrated during mammalian metabolism, 55
  microbial transformation of, 519
Nitrofen, kidney morphology and function in young of rats malnourished and exposed during pregnancy, 1
Nitrogen dioxide, changes in early alveolar particle clearance due to exposures in rabbits, 255
Nitrogen dioxide and ozone, toxicity to alveolar macrophages, 555

Organic solvents, benzene-specific increase in leukocyte alkaline phosphatase activity when exposed to, 581
Organochlorine pesticides, in human milk from Kenya, 449
Ozone and nitrogen dioxide, toxicity to alveolar macrophages, 555
Ozone and phosgene, species comparison of acute inhalation toxicity of, 43
Ozone-exposed rats, surface-tension measurements of pulmonary lavage from, 127

Parathion, interactions between cimetidine, methylparathion, and, 237
PCBs, association between lower embryonic weight in black-crowned night herons and, 383
Pentachlorophenol (PCP) and hexachlorobenzene (HCB), enhanced withdrawal from chickens, 359
Phosgene, pulmonary biochemical effects in rats, 413
Phosgene and ozone, species comparison of acute inhalation toxicity of, 43
Phthalate esters, contamination of platelet storage bags by, 591
Polychlorinated biphenyls and lipemia, effects on serum analytes, 369
Polycyclic aromatic hydrocarbons, induction of mixed-function oxidase activity in mouse lymphoid tissues by, 185
Powerline, epidemiologic study of Holstein cow milk production and reproduction near high-voltage direct-current, 303
Pyrite, pulmonary alveolar lipoproteinosis in rats following intratracheal injection of, 403

Response-surface methodology, interactions of genotoxic agents in cultured mammalian cells, 173

Sarin, soman, and tabun, acute effects on cyclic nucleotide metabolism in rat striatum, 23
Soman, sarin, and tabun, acute effects on cyclic nucleotide metabolism in rat striatum, 23

Tabun, soman, and sarin, acute effects on cyclic nucleotide metabolism in rat striatum, 23
Testicular toxicity and infertility, in rats treated with 1,3-dinitrobenzene, 477
Triethanolamine, lack of carcinogenicity in F344 rats, 345

Zinc, mechanism of protection against mercuric chloride toxicity in rats, 75
